UltraView™ 650TVL WDR Box Camera

Introduction

The UltraView™ 650TVL WDR box camera is a video surveillance camera, which provides a crisp 650TVL high resolution and excellent 0.01 lux sensitivity. Using the latest CCD sensors and DSP technology, the UltraView™ WDR Cam offers both 650TVL resolution and 0.01 lux low light sensitivity at the same time.

Based on dual shutter Wide Dynamic Range technology, the camera can acquire natural images with fewer blown-out highlights and hidden shadows under the most difficult lighting conditions. Its Adaptive Tone Reproduction –EX (ATR-EX) function utilizes a single shutter exposure frame with precise calculations leveraging the camera's a powerful DSP.

The UltraView™ box camera is designed for most indoor and outdoor circumstance with its advantages of high resolution and well-balanced spectral sensitivity, without compromising saturation and color accuracy. The IR cut filter along with intelligent algorithms optimize the Day/Night switch performance and eliminate annoying back-and-forth cycles under challenging lighting conditions.
